

Implant Supported Bridge #7-#10

Background: B.F. didn't want to take his teeth in and out of his mouth everyday anymore. He opted to have an implant supported bridge instead for comfort, function and esthetics. During treatment, B.F. required different procedures, ask Dr. Kubikian about more in-depth information.

Testimonial: "I was 20 years without front teeth and getting implants was the best investment I ever made. It helped my self esteem because I didn't have to worry about my denture slipping or sliding and it just made me feel better. To me, the pain was minimal compared to what I thought it was going to be. In a heartbeat, I would do it again, wish I had done it earlier. Thank you for everything!" B.F.-Woodbury, NJ
