

Esthetic Crown Lengthening #6-#11

Background: Pete was unhappy with his smile and wanted to have crowns and veneers done. However, Pete's problem was also in the uneven heights of his gums and teeth. Pete required crown lengthening so that the sizes of the teeth would be equal *before* veneers and crowns were done.

Testimonial: "Wish I didn't wait so long... the crown lengthening was simple and I had immediate results! Thanks for everything! - J.K. Philadelphia, PA"
