

# Implant #7 & #10 with Crowns

**Background:** M.P. was congenitally missing both #7 & #10. After completing orthodontics to recreate the space, bone grafting and implants were done so that she could have crowns on the implants. M.P. used an essix appliance while in active treatment to replace her missing teeth. M.P. required different procedures, ask Dr. Kubikian about more in-depth information.

**Testimonial:** "Thank you for finally giving me the teeth I never had!!" M.P.- Philadelphia, PA
