

Implant #8 with Crown

Background: B.C. had numerous crowns on her front tooth and the latest fracture has caused the tooth to be unrestorable. As a result, she wanted a dental implant with a single crown. B.C. had the implant placed the same day as the extraction.

Testimonial: "Things went beautifully and the end result was terrific. I'm very pleased with it all. I truly appreciate being put at ease. I was really apprehensive, but very pleased with everything, especially the end result." B.C.- Westmont, NJ.
