

**South Jersey Periodontics & Dental Implants Breaks Ground on Its New Home in Sewell, New Jersey
The 15,000 SF State-of-the-Art Facility would be the Largest Single Periodontal & Dental Implant
Location in the Country**

March 27, 2025 – Sewell, NJ – South Jersey Periodontics & Dental Implants (SJ Perio) announces the groundbreaking of its new facility and will host a gathering on Wednesday, April 16, 2025 at 1:00 pm to commemorate the event. This marks a milestone for the vision founder Daniel Kubikian, DMD embarked on in 2022. Located at 336 Egg Harbor Road in Sewell, the new 15,000 square foot state-of-the-art facility will nearly triple the size of the current practice including the number of operatories and parking. Already named a dental implant All-on-4® Center of Excellence by Nobel Biocare™, SJ Perio will become the largest single periodontal and dental implant facility in the United States. This groundbreaking event comes nearly 16 years from the day Dr. Kubikian first opened his practice only steps away from what will become its new home.

Washington Manor, as it will be known, will celebrate the true essence of American entrepreneurship, innovation and ingenuity. The nurturing environment will house dedicated areas for patient care and consultations and countless amenities for staff and patient caretakers. As a member of Penn Dental faculty and frequent sought after lecturer, Dr. Kubikian is committed to advancing implant dentistry and periodontal care. Washington Manor will be a teaching facility for continuing education that draws dentists, surgeons, hygienists and other professionals from throughout the area. The new home for SJ Perio will also welcome patients and colleagues alike who travel across the country for the latest advances in periodontal treatments, such as LANAP, its unique All-on-4® dental implants protocol and use of digital dentistry to create of 3D printed teeth.

Key in the project planning was the selection of local partners from the surrounding communities, including DeSimone Construction, Marathon Engineering and Bishop and Smith Architects. Says Dr. Kubikian, “For such a large-scale project, we had proposals from prominent regional companies but felt it important to support other local firms and stay true to our roots. Gloucester County has been extremely supportive of the practice over the past 16+ years and South Jersey is home. Bringing even better healthcare to the residents and more jobs to the region are driving us forward.”

About South Jersey Periodontics and Dental Implants: South Jersey Periodontics & Dental Implants has been advancing periodontics and dental implant dentistry since 2009. Led by Dr. Daniel Kubikian, its team of board-certified periodontists and implant specialists have expertise in saving teeth or using dental implants to replace single, multiple or full sets of teeth with its unique “digital” All-on-4® same-day placement and restoration approach earning Nobel Biocare™ Center of Excellence recognition. Patient care drives the skilled team, who works hand-in-hand with general and specialty dentists to ensure a continuum of treatment as well as regularly provides continuing education to doctors, hygienists and administrative staff.
